Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. The species are (as best understood) as follows:

Combination of shock absorber 10 and valve 20

Species A ---- Figure 1

Species B ---- Figure 3

Species C ---- Figure 10

Subcombination of valve 20

Subspecies a1 ---- figure 2

Subspecies a2 ---- figure 2a

Subspecies a3 ---- figure 4

Subspecies a4 ---- figure 5

Subspecies a5 ---- figure 6

Subspecies a6 ---- figure 7

Subspecies a7 ---- figure 9

3. Applicant is required, in reply to this action, to elect a single species and subspecies to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The following claim(s) are generic: no claims appear to be.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the combination of the shock absorber and valve as shown in the embodiments of figures 1,3 and 10 plus the different subspecies of valves are structurally different enough to support separate patents if claimed appropriately.

5. A telephone call was made to Marjama, Owen on 2/21/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
